

Experiment No-2

Open the eclipse

Steps

- 1: Click on file > New > Java Project > Give name Java Project name>finish
- 2: if project explorer window is not visible in eclipse:
Click on Window > Show view > Project Explorer
- 3: Click on project name you have created > Right click on src file > New > Class > Give class name(first letter capital)> Tick on public void main > Finish.
- 4 : Write code :

```
import java.awt.*;
import java.awt.event.*;
public class MouseListeners extends Frame implements MouseListener{
    Label l;
    MouseListeners(){
        addMouseListener(this);

        l=new Label();
        l.setBounds(20,50,100,20);
        add(l);
        setSize(300,300);
        setLayout(null);
        setVisible(true);
    }

    public void mouseClicked(MouseEvent e) {
        l.setText("Mouse Clicked");
    }
    public void mouseEntered(MouseEvent e) {
        l.setText("Mouse Entered");
    }
    public void mouseExited(MouseEvent e) {
        l.setText("Mouse Exited");
    }
    public void mousePressed(MouseEvent e) {
        l.setText("Mouse Pressed");
    }
    public void mouseReleased(MouseEvent e) {
        l.setText("Mouse Released");
    }
    public static void main(String[] args) {
```

```
new MouseListeners();  
}  
}
```

5 : Save the file and run the code
