

Servelet LoginPage

1. Go to Netbeans .
2. Create New Project with name :
Steps for Project Creation:
 1. Go to File
 2. Go to new Project
 3. Select **Java Web** and **Web Application**

3. In index.html

Write following code,

```
<!DOCTYPE html>
```

```
<!--
```

Click nbfs://nbhost/SystemFileSystem/Templates/Licenses/license-default.txt to change this license

Click nbfs://nbhost/SystemFileSystem/Templates/JSP_Servlet/Html.html to edit this template -->

```
<html>
```

```
<head>
```

```
<title>Login Page</title>
```

```
<meta charset="UTF-8">
```

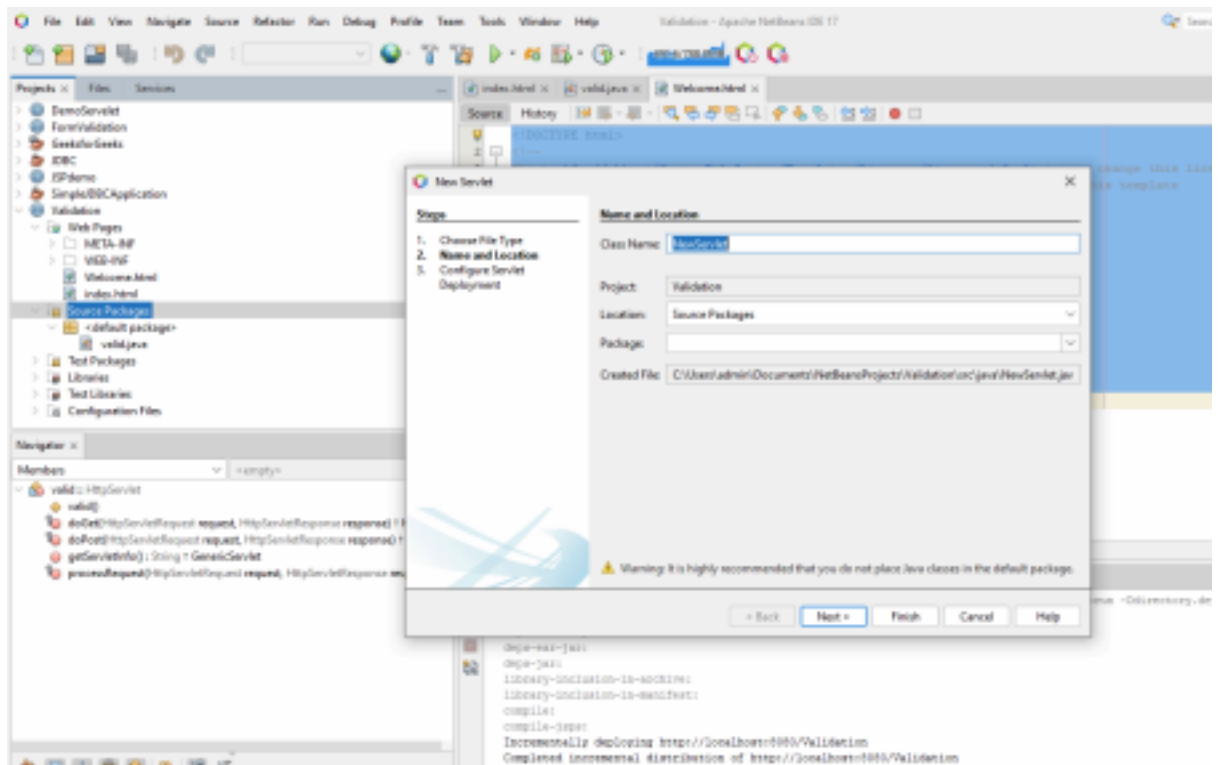

```
<meta name="viewport" content="width=device-width, initial-scale=1.0">
```

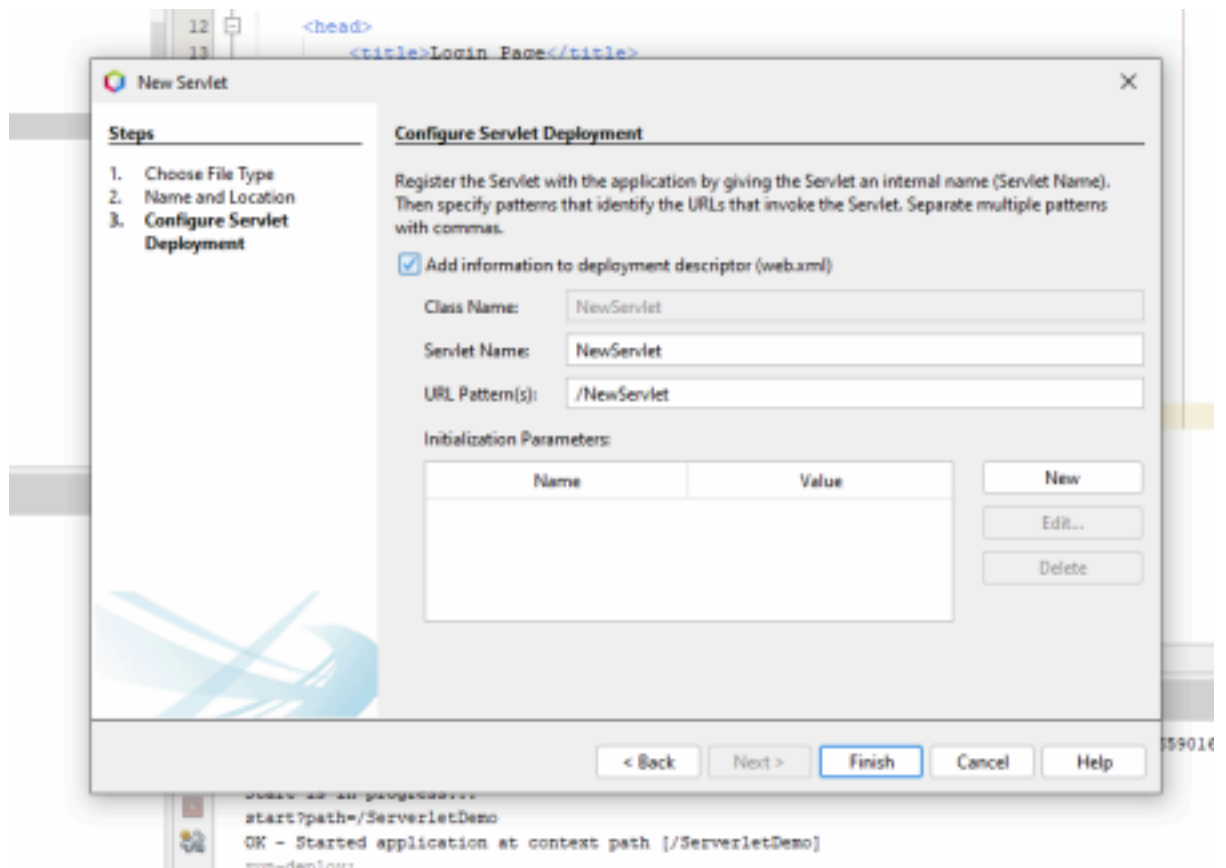

```

</head>
<body>
    <form action= "valid" method="post" >
        Enter UserName :
        <input type="text" name="uname" /> <br>
        Enter UserPass :
        <input type="text" name="upass" /> <br>
        <input type="submit" value ="Login" />
    </form>
</body>
</html>

```

- Go to Source Package, Right click on it, create new Servlet.
Give name to servlet as **valid.java**

Write following code in valid.java

```
import java.io.IOException;
import java.io.PrintWriter;
import jakarta.servlet.ServletException;
import jakarta.servlet.http.HttpServlet;
import jakarta.servlet.http.HttpServletRequest;
import jakarta.servlet.http.HttpServletResponse;
import jakarta.servlet.*;
/**
 *
 * @author admin
 */
public class valid extends HttpServlet {

    /**
     * Processes requests for both HTTP GET and
     POST
```

```

* methods.
*
* @param request servlet request
* @param response servlet response
* @throws ServletException if a servlet-specific error
occurs * @throws IOException if an I/O error occurs
*/
protected void processRequest(HttpServletRequest request
request, HttpServletResponse response)
    throws ServletException, IOException {
    response.setContentType("text/html;charset=UTF-8");
    try (PrintWriter out = response.getWriter()) {
        /* TODO output your page here. You may use following
sample code. */
        String uname =request.getParameter("uname");
        String upass =request.getParameter("upass");

        if(upass.equals("password123"))
        {
            RequestDispatcher reqDisp =
request.getRequestDispatcher("/Welcome.html");
            reqDisp.forward(request,response);
        }
        else
        {
            out.println("Sorry username or password error");
            RequestDispatcher
reqDisp=request.getRequestDispatcher("/index.html");
            reqDisp.include(request,response);
        }
    }

}

} // <editor-fold defaultstate="collapsed" desc="HttpServlet methods.
Click on the + sign on the left to edit the code.">

```

```

/**
 * Handles the HTTP <code>GET</code>
 method. *
 * @param request servlet request
 * @param response servlet response
 * @throws ServletException if a servlet-specific error
 occurs * @throws IOException if an I/O error occurs
 */
@Override
protected void doGet(HttpServletRequest request,
 HttpServletResponse response)
    throws ServletException, IOException {
    processRequest(request, response);
}

```

```

/**
 * Handles the HTTP <code>POST</code>
 method. *
 * @param request servlet request
 * @param response servlet response
 * @throws ServletException if a servlet-specific error
 occurs * @throws IOException if an I/O error occurs
 */
@Override
protected void doPost(HttpServletRequest request,
 HttpServletResponse response)
    throws ServletException, IOException {
    processRequest(request, response);
}

```

```

/**
 * Returns a short description of the servlet.
 *
 * @return a String containing servlet description

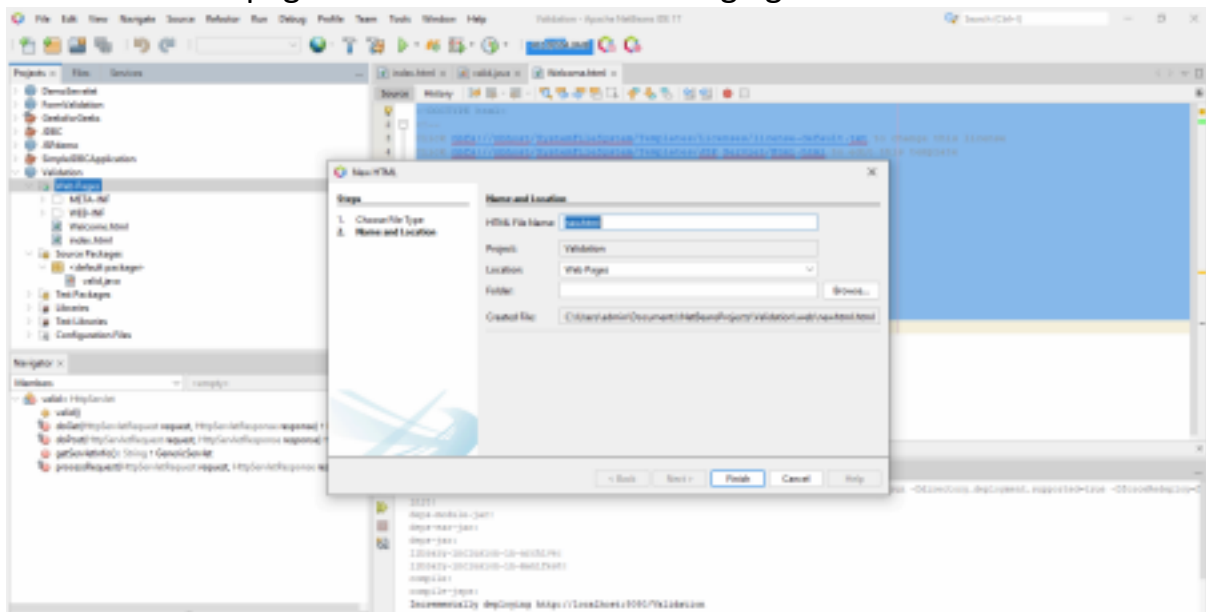

```

```

*/
@Override
public String getServletInfo() {
    return "Short description";
}
}

```

5. Go to webpages and create new HTML Page give name as **Welcome.html**

Write Following code in it

```
<!DOCTYPE html>
```

```
<!--
```

Click nbfs://nbhost/SystemFileSystem/Templates/Licenses/license-default.txt to change this license

Click nbfs://nbhost/SystemFileSystem/Templates/JSP_Servlet/Html.html to edit this template -->

```
<html>
```

```
<head>
```

```
<title>Welcome</title>
```

```
<meta charset="UTF-8">
```

```
<meta name="viewport" content="width=device-width, initial-scale=1.0">
```

```
</head>
```

```
<body>
```

```
<<h1>Welcome to the page</h1>
```

```
Login Confirmed!!
```

```
</body>
```

```
</html>
```

6. Runvalid .html
